

AC 717 J

INTRO

Flexible Cloth for Belts
 Grit Format: FEPA P
 Available Grit Range: P60 ~ P400

CONSTRUCTION

Cloth Type: Polyester and Cotton Hybrid
 Bonding: Resin over Resin with Cool-Ag
 Grain Type: Semi-Friable Aluminum Oxide with Strong Bond

Converted Materials: Rolls / Narrow Belts
 Maximum Width: 1450mm

PRODUCTS' ADVANTAGE

- Cool-Ag provides cooler working surface makes it suitable for tough materials
- Closer coat for high removal rate
- Semi-friability offers better cut and longer lifetime
- Smooth cloth surface for better surface quality

APPLICATION

- Most suitable for surgical equipment industries
- Less flexible compared to JF, provides a more rigid bond
- Flexible belt operations on corners and round surfaces
- Belt grinding tools
- Effective on curvature surfaces
