

# SC 717 J/S

## INTRO

Flexible Cloth for Belts  
 Grit Format: FEPA P  
 Available Grit Range: P60 ~ P400

## CONSTRUCTION

Cloth Type: Polyester and Cotton Hybrid  
 Bonding: Resin over Resin / Stearate Coating on Top  
 Grain Type: Silicon Carbide

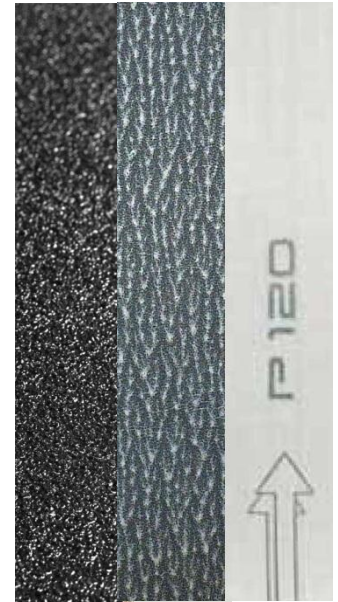

Converted Materials: Rolls / Narrow Belts  
 Maximum Width: 1450mm

## PRODUCTS' ADVANTAGE

- Stearate cleans the clog from the grinded material
- Close coat not effected by clogging
- Silicon Carbide for maximum toughness and high removal
- Smooth cloth surface for better surface quality

## APPLICATION

- Most suitable for fixture and armature industries
- Also used on marble, stoneworks sculpting
- Less flexible compared to JF, provides a more rigid bond
- Flexible belt operations on corners and round surfaces
- Belt grinding tools
- Effective on curvature surfaces

## MOST COMMON GRIT CONSUMPTION

P60	P80	P100	P120	P150	P180	P220	P240	P280	P320	P400	P500	P600
